K Hemanth Kumar

BI & Data Platform Administrator | Tableau • Power BI • Microsoft Fabric

+91 76589 96272 | heemanth.tableau@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Results-driven Data Platform Administrator with 5+ years of hands-on experience managing enterprise analytics platforms across Tableau, Power BI, Microsoft Fabric, SAP BusinessObjects. Currently working on premises to Tableau Cloud migration at Warner Bros. Discovery while driving platform modernization across multi-tool BI ecosystems. Deep expertise in high-availability architecture, SSL/SAML/AD/Okta security, extract automation, RLS, and end-to-end admin lifecycle management across Dev, UAT, and Production environments. Skilled in scripting and automation using Tabcmd, TSM CLI, Python, and REST APIs consistently delivering ~99.9% platform uptime. Microsoft Certified and Databricks Certified, with a strong track record of cross-functional collaboration, SLA adherence, and business-user enablement.

TECHNICAL SKILLS

BI Platforms	Tableau Desktop, Tableau Prep, Tableau Server, Tableau Cloud, Power BI Desktop & Service, Microsoft Fabric, SAP BusinessObjects (BO), Cognos Analytics, Databricks
Data sources	Snowflake, Databricks, Azure Data Lake, Oracle, SQL Server, SAS, Lakehouse
Server Admin	Installation, HA Cluster Setup, SSL/SAML/AD/Okta Integration, Scheduling, Subscriptions, Alerts, Monitoring, On-Prem to Cloud Migration, Tableau Bridge
Visualization	Dashboard Design, Data Blending, Data Modeling, RLS, LOD Expressions, Power Query, DAX, Parameters.
Scripting & Auto.	Tabcmd, TSM CLI, Batch Script, Python, REST API
AI Tools	ChatGPT Projects, Microsoft Copilot Agents, Claude, Tableau MCP
OS / Cloud	Windows Server, Azure, Tableau Cloud
ITSM / Ticketing	SCCD, SailPoint, Service Now, Change Request Management

PROFESSIONAL EXPERIENCE

Data Platform Administrator — Tableau, Power BI & SAP BO

Jul 2026 – Present

Warner Bros. Discovery (WBD)

Tableau Administration & On-Prem to Cloud Migration

- Working on **Tableau Server** to **Tableau Cloud migration** initiative, architecting migration strategy, content validation, and user onboarding roadmap.
- Performing full Tableau Server and Tableau Cloud administration — user/group management, permissions, site governance, and licensing across all environments.
- Managing **Okta group integration** for Tableau to streamline identity-based access provisioning and enforce least-privilege access controls at scale.
- Configuring and maintaining extract refresh schedules, subscriptions, and data-driven alerts post-migration to Tableau Cloud.
- Validating workbook and data source compatibility with pre/post migration and performance benchmarking.
- Monitoring platform health, backgrounder queues, and job failures using Admin Views; establishing Cloud-equivalent monitoring practices.

Power BI Administration

- Administering **Power BI Service** workspaces, datasets, and capacity across Dev, Test, and Prod environments.

- Managing On-Premises Data Gateway configurations for hybrid connectivity and supporting semantic model refresh troubleshooting.
- Enforcing RBAC and RLS policies across Power BI workspaces in line with organizational data governance requirements.

SAP BusinessObjects (BO) Administration

- Performing SAP BO admin activities including user access management, roles, capabilities, and security configuration.
- Supporting universe administration, report scheduling, content backup, patching, and change request deployments in BO environments.
- Handling production incidents related to report failures, refreshing jobs, and connectivity issues.

BI Platform Administrator

Cognizant Technology Solutions – Hyderabad | Client: Emblem Health, New York **Jul 2021 – Jun 2026**

Tableau Server Administration

- Administered enterprise **Tableau Server (2021.x+)** across Dev, UAT, and Production (Internal & External) environments serving thousands of users.
- Deployed and maintained **High Availability Tableau Server clusters** with F5 Load Balancer, ensuring platform stability and 99% uptime.
- Led multiple **Tableau Server upgrades and patching activities** with zero rollback incidents and minimal user disruption.
- Automated ~60% of routine admin tasks using Tabcmd, SailPoint, Python, and REST APIs — saving ~10 hours per week.
- Implemented SSL certificates, SAML-based SSO for external users, and Active Directory (AD) authentication for internal users.
- Managed users, groups, roles, permissions, and site content aligned with enterprise data governance and security standards.
- Implemented **row-level security (RLS)** for external production users using user filters and group-based access controls.
- Created and maintained extract refresh schedules, subscriptions, and data-driven alerts for reliable data delivery to stakeholders.
- Monitored Tableau Server health via TSM and Admin Views; proactively resolved backgrounder and extract failures.
- Handled incident, service, and change requests through **SCCD ticketing**, consistently meeting SLA targets.
- Built internal Tableau admin dashboards using the PostgreSQL repository to track user activity, content usage, and login trends.
- Designed and published interactive Tableau dashboards using Oracle, SQL Server, Excel, Snowflake, and SAS data sources.
- Optimized dashboard performance by reducing quick filters, leveraging extracts, and applying best practices.
- Delivered training sessions for business users, improving self-service BI adoption across the organization.
- Managed Tableau Server licensing — role-based assignment, activation, renewal, and audits.
- Performed log cleanup, housekeeping, and automated log rotation to manage disk usage efficiently.
- Scheduled and monitored weekly full Tableau content backups ensuring secure recovery of workbooks, data sources, and metadata.
- Raised and managed Tableau vendor support cases, working with Tableau Support to troubleshoot and apply fixes.

Power BI & Microsoft Fabric Administration

- Administered **Microsoft Fabric & Power BI Service** across Dev, Test, and Prod as part of enterprise migration initiatives.
- Managed Fabric assets (Lakehouse, Pipelines, Notebooks, Warehouses, Semantic Models) with RBAC & RLS governance.
- Configured and maintained On-Premises Data Gateway for secure hybrid data connectivity.
- Monitored and supported Power BI semantic model refreshes, resolving failures and validating schedules — improving refresh success rate from **82% to 97%**.
- Managed Fabric Deployment pipelines and conducted post-production validation activities.

Cognos Analytics Administration

- Supported Cognos Analytics administration including user access, roles, capabilities, data source connections, upgrades, and security configuration.
- Handled production issues, refreshes, job failures, content backups, patching, and CR-based deployments in Cognos environments.

EDUCATION

Bachelor of Technology (B.Tech) – Electronics & Communication Engineering
Sri Mittapalli College of Engineering (JNTUK) | 2017

KEY ACHIEVEMENTS

- Reduced Tableau Server downtime by **30%** through proactive monitoring and preventive maintenance at Emblem Health.
- Improved Power BI dataset refresh success rate from **82% to 97%** through systematic troubleshooting and gateway optimization.
- Built internal Tableau admin dashboards to monitor user traffic, workbook usage, and login trends across enterprise environments.
- Saved ~10 hours per week by automating routine admin tasks using Tabcmd, Python, and REST APIs.
- Successfully led Tableau Server upgrades across multiple versions with zero rollback incidents in production.

CERTIFICATIONS

- Microsoft Certified: **AZ-900** – Azure Fundamentals
- Microsoft Certified: **AZ-104** – Azure Administrator Associate
- Microsoft Certified: **DP-600** – Fabric Analytics Engineer Associate
- Microsoft Certified: **DP-700** – Fabric Data Engineer Associate
- Microsoft Certified: **DP-750** – Fabric AI Engineer Associate
- Microsoft Certified: **DP-800** – SQL AI Developer Associate
- Microsoft Certified: **PL-300** – Power BI Data Analyst Associate
- Microsoft Certified: **AI-900** – Azure AI Fundamentals
- **Databricks Certified** Data Engineer Associate
- **Databricks Certified** Data Engineer Professional
- **Databricks Certified** Generative AI Engineer Associate
- **Claude** Certified Architect - Foundations
